Harvest Yield Analysis

Are you considering VRT on your operation? Do you need soil or grid sampling? Contact Will Thoele for all your Precision Ag needs at 785.241.0391

How We Can Help

We have financing options available to help assist with your farming needs.

The input financing program offers attractive rate options that allow you to save on products while delaying payment until after harvest when you get paid for your crops.

Consider taking advantage of pre-pay options on your inputs in our crop production, seed and fuel departments. Contact your local sales agronomist to make a plan for success today!
